

# How to control rooms you rarely enter

Danfoss Link™ – Wireless control, comfort and convenience

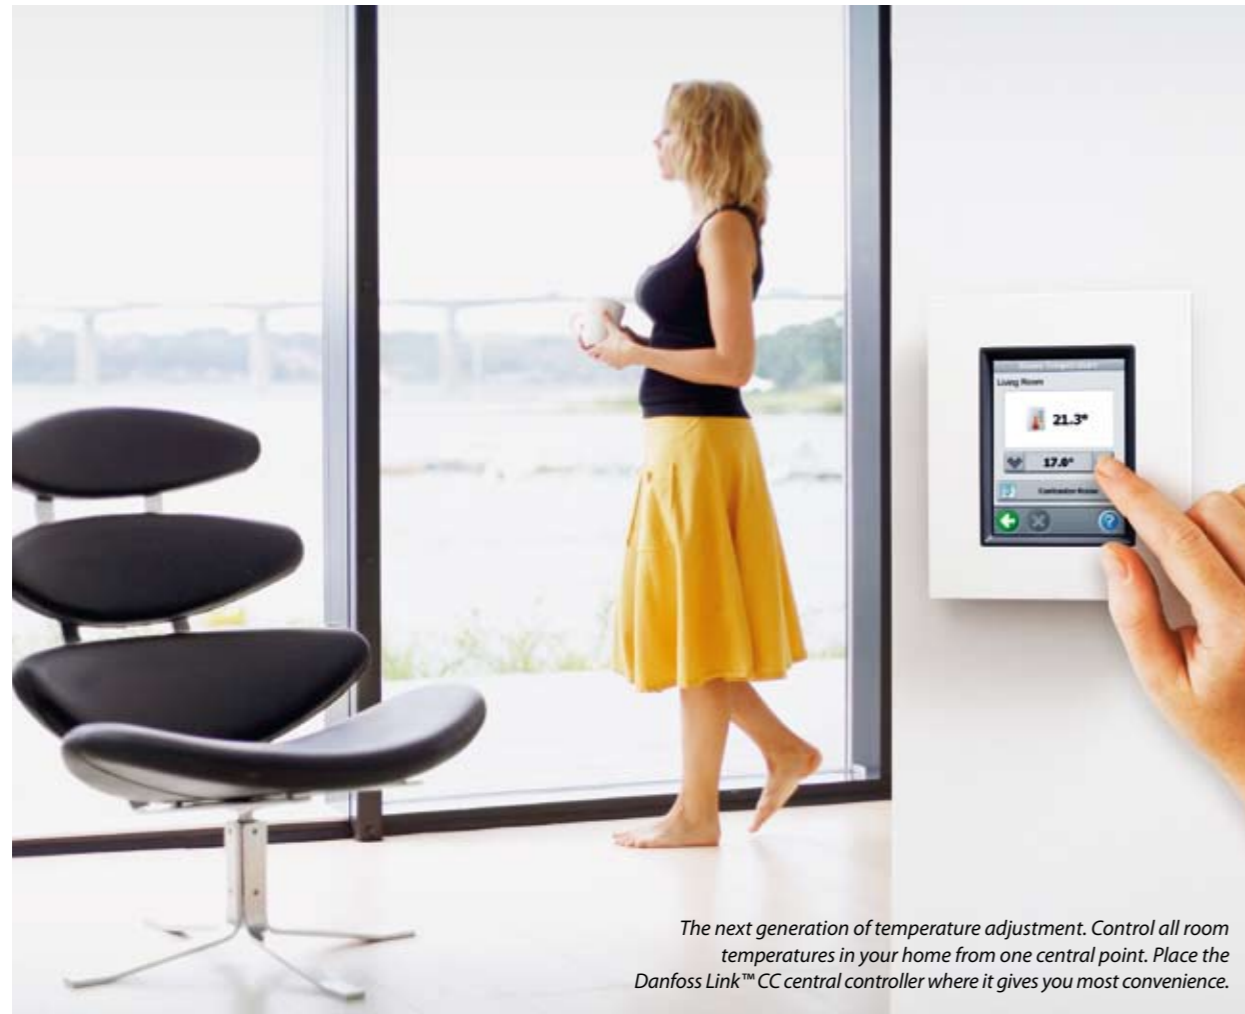

At Danfoss, we are proud to offer you nothing less than a revolutionary world novelty within electrical floor heating. We call it Danfoss Link™. Wireless heating control with the ability to adjust all temperatures

of your home from one central control point in your house. So here it is. The perfect means to keep control – also in places you're not welcome.

# Wireless temperature adjustment – from one central point in your home

Safe and reliable, Danfoss Link™ is a two-way communication system based on wireless technology. If you think that advanced indoor heating control is complicated, inconvenient and expensive – think again. Danfoss Link™ is here for your convenience, setting new standards within modern heating control. It is state-of-the-art technology, giving you the possibility of controlling your indoor temperatures from one central place in your home. The Danfoss Link™ solution

consists of three wireless devices: The mandatory Danfoss Link™ CC (central controller) and Danfoss Link™ FT (floor thermostat) as well as the optional Danfoss Link™ RS (room sensor). Put together these devices give you an indoor environment you can easily enjoy to the fullest every day.

*The next generation of temperature adjustment. Control all room temperatures in your home from one central point. Place the Danfoss Link™ CC central controller where it gives you most convenience.*

*Place the optional Danfoss Link™ RS (Room Sensor) in each of the rooms you wish to control and adjust based on room temperature. The Danfoss Link™ RS is battery-operated which gives you the freedom to place it wherever you like it to be.*

## Accurate heating in your house: 20.5 degrees means 20.5 degrees

Reliable and user-friendly, Danfoss Link™ consists of a centrally placed main unit for controlling of sensors and thermostats throughout the house. It gives you exactly the heating comfort you demand.

24-7-365, this piece of modern equipment puts you in control of all individual temperatures within your home. Regardless of the room, you easily adjust temperatures as you like it. It is easy. Different personalities mean different needs and thus different temperatures. Danfoss Link™ makes everybody happy.

*Danfoss Link™ FT (Floor Thermostat) is a relay switching on and off the heating mats/cables placed underneath the floor. It communicates wirelessly with both Danfoss Link™ CC and Danfoss Link™ RS. Simply place the Danfoss Link™ FT discreetly above the baseboard, e.g. behind curtains or drapes. Danfoss Link™ FT fits perfectly in your frame system (ELKO, ELJO and JUSSI) and is therefore easily replaceable with your existing thermostat.*

# A cutting edge solution – stylish and timeless design for every home

## Selected features of Danfoss Link™

Danfoss Link™ is the heating control system of tomorrow. It builds on a scalable platform, so new requirements are easy integrated. The system is build to expand with your

needs. Below are listed some of the key features to give you an impression of the many possibilities.

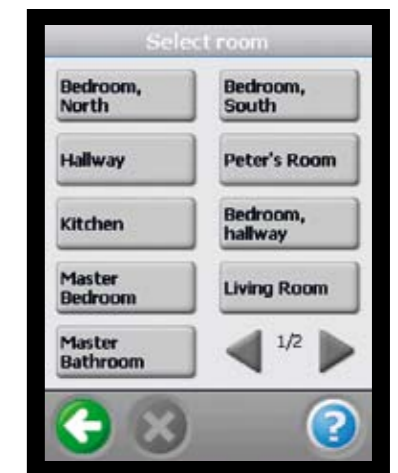

### User-friendly interface

Simple user interface with touch screen display makes your navigation easy.

### Plan your holidays

Turn down the heat when you're away from home or activate vacation mode before you leave.

### Adjust heating from one place

Control your entire house from the central controller – placed exactly where you want it.

Danfoss Link™ is intelligent and wireless communication technology on the inside and stylish on the outside with its timeless design. A design created to blend perfectly into any environment, no matter your interior.

## User-friendly touch screen display with easy-to-operate functions

Danfoss Link™ is simple and easy to operate for every member of the family. With just a few taps on the intelligent touch screen control display, you can adjust temperatures. The clever touch screen is highly user-friendly and guides you – in multilanguage – through all the choices you make. In case you need assistance a context sensitive help guide assists you on every screen image. On the opposite page you can see some of the features of Danfoss Link™

## Less installation time – wireless set-up in no time

Enjoy the wonderful indoor environment of your home almost instantly. Danfoss Link™ is up and running in no time. Due to technology, the wireless installation requires a minimum of wiring work from a professional contractor.

## Think green! – optimize energy consumption to the benefit of the environment

Danfoss Link™ is cost-effective consumption of energy. At all times. No more waste of energy as you can easily schedule your weekly heating requirements in terms of when you're away, when sleeping or when needing less warmth. And in addition, the away function makes you save energy, hence money, when you are away from home. Simply plot in your away-period and Danfoss Link™ adjusts temperatures.

### Individual temperature adjustment

In just a few steps you can adjust temperatures for each individual room in your house.

### Daily overview

Control the daily heating to the pleasure of everyone. Adjustment is simple and can be done quickly.

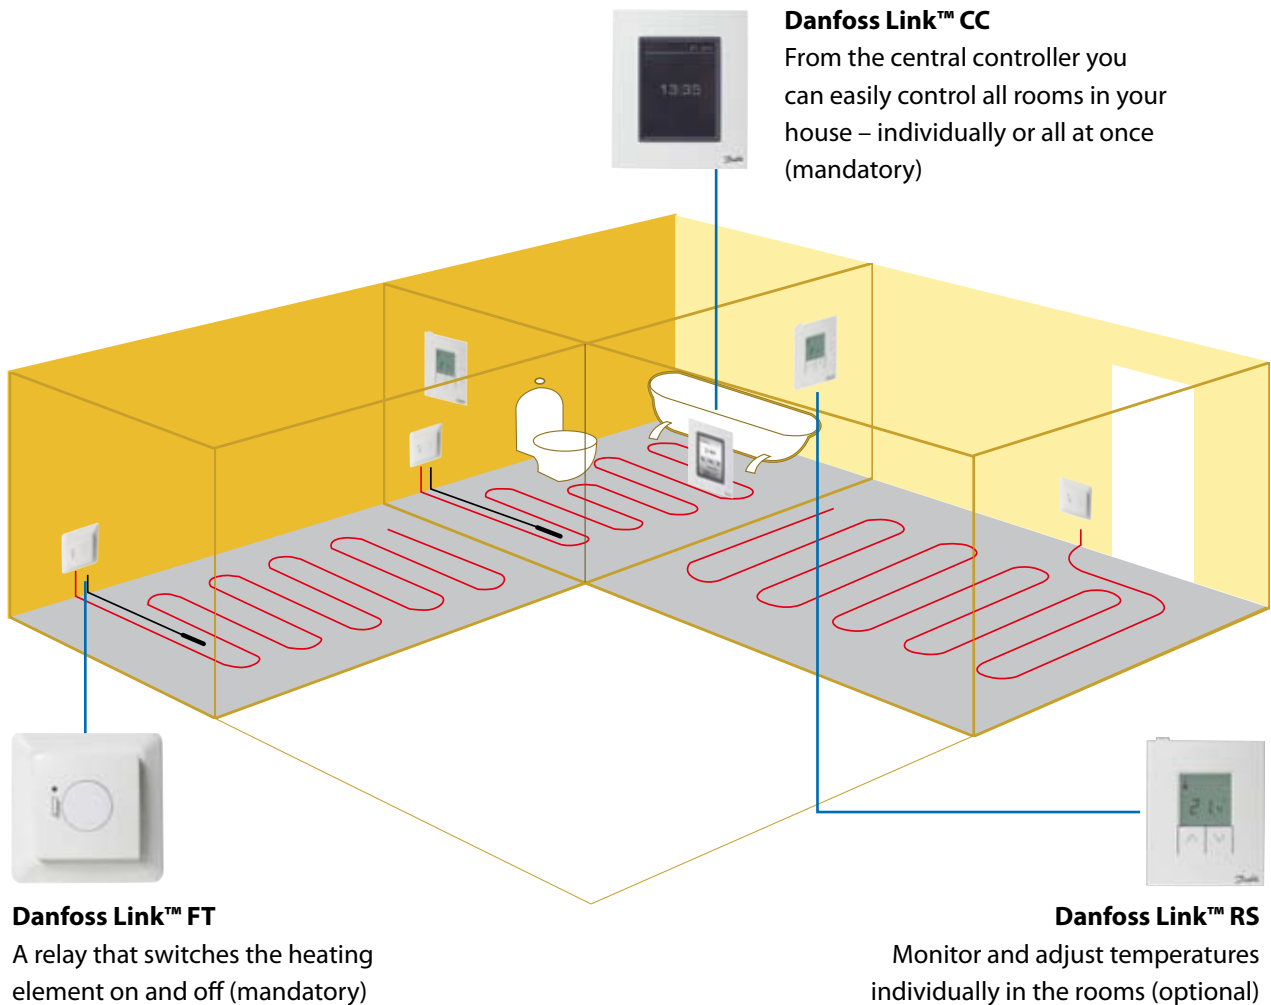

### Schedule your heating

Monitor and control the heating of your entire house with the intelligent heating schedule.
